

## Centerpoint Adjustable Banner Display

*The Centerpoint Adjustable Banner Display offers a unique new display solution. The banner attaches like a typical "X" display but the center hub allows the banner to rotate 360 degrees or tilt up or down. The center hub sits atop a telescoping pole, with a pole height that is adjustable from 42" up to 72". When table space is limited, the Centerpoint is ideal to place behind the table as a great backdrop for your message.*
